SUMMARY

Frontend Developer with strong fundamentals in JavaScript (ES6+), TypeScript, HTML5, and CSS3. Hands-on experience with Angular, React, and Next.js; styling with SCSS, Tailwind, and Bootstrap; version control with Git/GitHub; and building accessible, responsive UIs. Computer Science graduate passionate about clean code, usability, and delivering engaging web experiences.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frameworks & Libraries:** Angular, React, Next.js, Redux
- **Styling:** SCSS/Sass, Tailwind CSS, Bootstrap
- **Tools & Ecosystem:** Git, GitHub, npm
- **Practices:** Responsive Design, Accessibility, SEO basics, OOP, Design Patterns, Agile

EXPERIENCE

Freelance Frontend Developer — Self-Employed (Remote) | 2025 (intermittent engagements)

- Delivered UI features and component work for internal projects across small businesses and teams.
- Built and refined pages and components in React/Next.js and Angular using TypeScript, SCSS, and Tailwind CSS.
- Integrated REST APIs; implemented loading states, error handling, and basic caching strategies.
- Applied accessibility best practices (semantic HTML, keyboard navigation, ARIA) and responsive design.
- Collaborated via Git/GitHub; managed tasks from briefs/tickets, provided estimates, and documented handoffs.

Frontend Intern — Banque Misr (Digital Factory), Cairo | Jul 2023 – Sep 2023

- Contributed to frontend features in Angular, implementing reusable, responsive components with HTML, SCSS, and Tailwind CSS.
- Collaborated via Git/GitHub on branch-based workflows and code reviews.
- Worked within an Agile setup and followed best practices for component structure and styling consistency.

PROJECTS

E-Commerce Platform — Angular - <https://e-commerce-by-angular.vercel.app>

- Developed a responsive e-commerce application with product browsing, cart management, authentication, and checkout workflows.
- Implemented JWT authentication, route guards, REST API integration, and state management using RxJS and Angular services.
- Improved performance through lazy loading, image optimization, caching, and local storage persistence.

Currency Exchange Dashboard — Angular - <https://github.com/amar-omar/currency>

- Developed a responsive currency exchange application featuring real-time currency conversion, comparison, and portfolio tracking of favorite currencies.
- Built interactive dashboards using Angular, TypeScript, Sass, and Tailwind CSS, optimized for desktop and mobile devices.
- Implemented live exchange rate updates and personalized favorites management to enhance user engagement and usability.

EDUCATION

B.Sc. in Computer Science — Thebes Higher Institute of Management & Information Technology (Integrated Thebes Academy) | 2020 – 2024
